**Subject:** Animas Spill/Purestream Water Technologies/Services

Sarah,

Wesley Smith of Governor Herbert's office recommended we reach out to you as someone who might be able to provide information to us regarding remediation of the Animas spill.

Purestream is a water treatment and services company primarily treating produced and frac water for re-use and discharge in the oil and gas field. We currently operate high-volume facilities in Wyoming, Arkansas and Pennsylvania un NPDES permits regulated by state DEQ/EPA.

Lisa Biddle in your DC Water Office is familiar with our technologies and she, along with staff of Region 10 have toured our Arkansas operations. I reached out to Lisa, however, it looks like she is out of the office for a few days.

Purestream is interested in discussing an opportunity to assist in the environmental remediation of the contaminated water from the Animas spill.

What is the best path for this? Would you have time Thursday or Friday to talk on the phone regarding this?

Many thanks for your consideration,

Amy
